Message: Some coaches in this province and some "expert observers" who love to be anonymous bad mouthers on this board seem to think that a rhythmic routine is all about body skills and pausing carefully each time in preparation for those skills while using the apparatus minimaly or as decoration. Rhythmics is more than that and artistic components (including extensively developed apparatus manipulation and risk) need to be introduced and taught early on -even though execution will be somewhat compromised initially. Gymnasts with strong artistic abilities eventually make it to the top of the national team in this country, while other's lacking in this area cannot compare. Aspersions again judges who know what they see (and don't) is a cheap excuse for coaches who are not transferring the skill and tradition to their gymnasts. I know that this comment will just bring a barrage of more nastiness blaming the judges but it is often easier to blame the system than to look at one's own work and note its deficiencies. I just tuned in here to see if scores were posted from the Provincials, BUT WON'T BE BACK any time soon because unfortunately this Forum is still after so many years a convenient place for sore losers to come and wallow and complain and blame (and disparage) others for their own shortcomings. 😞
